Manufacturer	Cisco
Part number	ASR-920-PWR-A
Nominal output	Refer to manufacturer; no assumed output rating
Input technology	AC
Airflow	Confirm chassis direction and PSU label
Ordering	Independent spare or extra PSU; price by inquiry

Verified host chassis

ASR-920-24SZ-IM, ASR-920-24SZ-M, ASR-920-24TZ-M

Configuration conditions

Chassis compatibility is not a complete power-budget approval. Verify actual input voltage, regional cord/connector, PSU and fan airflow, existing PSU type, required redundancy, installed cards and PoE load. Do not count a bundled PSU twice. Unknown PIDs are not matched by similar names. The 260W figure in the source is input power; this sheet does not claim 260W output.
