FiberBox

The FiberBox is an outdoor switch with five SFP ports, ideal for locations where distance is restricting the use of regular ethernet cables. The device is weatherproof and comes with a hose clamp and zip ties, ready to be installed on high masts and towers.

The package also includes the RJ45 SFP (S-RJ01) copper module already preinstalled in the first port, so you can use ethernet in one of the ports already out of the box. If not needed, remove it to have access to all five SFP ports for using with 1.25G fiber modules.

Specifications

Product code	FiberBox
CPU	QCA8511 400 MHz
Size of RAM	128 MB
Storage type	Flash
Storage size	16 MB
SFP	5x 1.25G Ethernet SFP cage (Mini-GBIC); DDMI supported. One S-RJ01 Rj45 SFP module included.
Dimensions	125 x 178 x 48 mm
License level	5
Operating temperature	-20 to 70° C
Operating System	RouterOS
Max Power consumption	11 W
LEDs	9x LEDs (1x user LED)

Included

24V 0.8A power adapter

Hose clamp

Dinrail mounting bracket set (K-27)

S-RJ01 R45 SFP module
