RouterBOARD 44GV

RB44GV is an improved version of the popular RB44 gigabit four port PCI interface.

This new card is based on the popular VIA VT6122 chipset.

It supports MDI-X auto cross/straight cable detection, 10/100/1000 speeds and can be used in any operating system which has drivers for VT6122, including Windows, Linux and RouterOS.

Use it to interconnect multiple networks to your router - RB44GV will cope with any situation.

Chipset	VIA VT6122
Ports	Four 10/100/1000Mbit ports
Features	MDI/X: cross/straight cable autodetection
Compatibility	IEEE 802.3 10BaseT; IEEE 802.3u 100BaseTX Fast Ethernet; VLAN 802.1q
OS	MikroTik RouterOS, Windows, Linux, BSD
Dimensions	107 x 124 x 19 mm
