MIKROTIK

LGO-LTE-W

A compact 617–5925 MHz antenna for LTE and LoRa® connectivity. With 3 dBi gain, an SMA male connector, and a much smaller footprint than the HGO-LTE-W, it's an easy fit for compact IoT installations.

Vending & coffee machines

There's never enough space in those machines... until now!

Industrial cabinets

More room for better cooling and access - the maintenance crew will be happy

Remote monitoring

Tiny footprint attracts less unwanted attention.

Cold-chain equipment

In logistics, save space to save money... without cutting corners.

Asset tracking

When the inventory is compact, the antenna should be too.

Recommended for KNOT LR8G and LR9G kits, as well as KNOT Embedded LTE and KNOT Embedded LTE4 Global. Its compact size makes it particularly convenient for the smaller KNOT Embedded form factor.

Specifications

Product code	DPD0830AL08
Connector type	SMA male
Dimensions	172 x 19 x 13 mm
Operating temperature	-30°C to +75°C

Antenna gain pattern
