23–40 Rack Rail R0

Universal rack rails for larger devices and deep server cabinets from 23” to 40”.

Perfect for products like RDS2216, CCR2216, CRS520, CRS812, CRS804, and future large-format MikroTik devices. The rails provide stable rear support in deep racks where standard rack ears are not enough.

Durable, compact and great for cost-effective shipping & storage.

The rear section can also be used to mount a smaller MikroTik device, helping you use rack space more efficiently.
