RouterBOARD 411/A

The heart of RB411 is the new Atheros CPU which makes this tiny device a quick one. Tests show that it is up to three times more powerful than our previous model.

Comparing to RB411, the RB411A adds more memory and a Level4 license.

RB411/A includes RouterOS - the operating system, which will turn this powerful system into a highly sophisticated router/firewall or bandwidth manager.

One small device - with all the power of RouterOS. At a very special price.
