RB14e

RB14eU

RB14e

RB14e is an adapter card for using four miniPCIe wireless cards in a PC with a PCIe slot. This gives you the ability to use our new R11e wireless interfaces in conventional PC computers.

Another model, the RB14eU is available for using 3G miniPCIe cards, in addition to wireless cards. For this purpose, SIM card slots are provided for all four interfaces, as well as USB ports to ensure USB connectivity to the host PC, which is required for 3G miniPCIe cards.

Use this new adapter to expand your connectivity and upgrade your device to use the latest miniPCIe interface cards.

Each comes with both low and regular profile brackets. Brackets include holes for mounting SMA connectors, or for using as cable exit holes.
