Dependencies and limits

Host listing is conditional on the exact slot, carrier/adaptor, installed DSP, software release, operating mode and licence. The selection tool does not certify a complete simultaneous slot allocation. Check the full per-host conditions in the product page and compatibility CSV before supply. Do not equate NM, NIM, SM-X, PIM, SPA, EPA or MPA form factors. DSP channel ratings depend on codec complexity and host limits. Motherboard PVDM4 is not assumed on ISR4461 or Catalyst 8200/8300. SM-X-PVDM requires at least 8GB RAM. IP media DSPs do not replace the PVDM on an MFT for TDM.
